

Case Studies Page (Reusable Template)

Purpose

The Case Studies page is not a portfolio.

Its purpose is to demonstrate real business impact and build trust by showing how Framkant Nordic solves real problems for real businesses.

Every case study should follow the exact same structure.

This makes the page consistent, scalable, and easy to expand as new clients are added.

Page Hero

Headline

Real Businesses. Real Results.

Supporting Text

Every business is different, but our approach remains the same.

We identify opportunities, build the right digital systems, and continuously optimize for long-term growth.

Explore how we've helped businesses improve their digital presence and generate measurable business results.

Case Study Layout

Each case study should follow the exact same structure.

Section 1 — Client Overview

Display a clean overview of the client.

Include:

- Business name
- Industry
- Location
- Services provided
- Project duration

Example

Hårakuten

Industry

Beauty Salon

Location

Skellefteå, Sweden

Services

- Website Design
- Local SEO
- CRM
- Review Management
- Marketing Automation

Section 2 — The Challenge

Explain the client's situation before working with Framkant Nordic.

Focus on business challenges, not technical issues.

Example

The Challenge

Hårakuten had built a strong reputation over many years, but its digital presence no longer reflected the quality of the business.

The website was outdated, local visibility could be improved, customer communication was largely manual, and there was no structured system for collecting reviews or following up with leads.

Section 3 — Our Solution

Explain what Framkant Nordic built.

Avoid technical jargon.

Focus on business value.

Example

Our Solution

We redesigned the website from the ground up, implemented a CRM system, automated customer communication, improved local SEO, and introduced a structured review generation system.

Every component was connected into one digital growth system designed to support long-term business growth.

Section 4 — Results

This should be one of the strongest visual sections.

Display measurable outcomes whenever possible.

Example

Results

- Modern professional website
- Improved customer experience
- Automated follow-up
- Increased Google Reviews
- Better local visibility

- Stronger digital brand

If numerical data becomes available, display it prominently.

Examples:

- +48% Organic Traffic
 - +65 Google Reviews
 - +32% Lead Growth
 - +18% Conversion Rate
-

Section 5 — Client Experience

Display a testimonial from the client.

Use a large quote block.

Include:

- Client name
- Position
- Company

This section should feel personal and authentic.

Section 6 — Project Gallery

Display visuals from the project.

Possible content:

- Website screenshots
- Mobile version
- CRM dashboards
- Automation workflows
- Analytics dashboards
- Google Business Profile

Use a clean image gallery with generous spacing.

Section 7 — Services Used

Display the services included in this project.

Example

- ✓ Website Design
- ✓ Local SEO
- ✓ CRM
- ✓ Marketing Automation
- ✓ AI Chat

Each service should link to its dedicated service page.

Section 8 — Related Case Studies

Recommend additional projects.

Example

You may also like:

- T Glow Studio
- Future Cleaning Company
- Future Construction Company

This encourages visitors to continue exploring.

Design Guidelines

Every case study should use the exact same layout.

Maintain consistency in:

- Typography
- Image sizes
- Section order
- Cards
- Icons
- White space
- Animations
- CTA placement

Only the content should change.

This allows the website to scale as new case studies are added over time.

Future Scalability

The developer should build this as a reusable template.

Creating a new case study should only require replacing:

- Client information
- Images
- Challenge
- Solution
- Results
- Testimonial

Everything else should remain identical.

This ensures consistency, improves maintenance, and allows the Case Studies section to grow into one of the strongest trust-building assets on the website.
